Cedar Grove,

New Jersey

INTRODUCTION

It is with pleasure we present our 1929 list of dahlias. You will find many varieties replaced with new and better ones. We are eliminating all those which do not measure up to the newer ones and for which there has been small demand. We think every one of these dahlias listed will do well with you and if given proper care can win in any show.

We have had the pleasure of winning with some of these varieties at both Newark and New York. Display at New York was awarded Gold Medal Ribbon. At Newark we won with some seedlings we hope to have in sufficient quantity to present next year.

In regard to prices we do not attempt to sell lowest, but to send out only finest field grown stock and true to name. Where quantity of stock justifies we have made our prices low as possible.

We wish to thank our customers for their kind patronage this past year and wish each and all a Happy and Prosperous New Year with more and better dahlias.

The stems are perfectly straight, very long and exceedingly strong. The flower has good size, great depth and substance with excellent keeping qualities that will make it in great demand by gardens supplying florists and other cut flower trade. Stock very limited.
